

Environment Policy Statement

Applied Power Engineering Ltd (APE) recognises the need to operate its business in a manner consistent with sound environmental management practices, balancing the business aims with the requirement to manage and protect the environment. In undertaking its operations, the company is committed to continued improvements in aspects and reduce any impacts of its business on the environment.

It is the policy of Applied Power Engineering to:

- Ensure that APE is committed to complying with all relevant environmental legislative requirements, other duties, and responsibilities, and set company objectives appertaining to environmental aspects of our business.
- Ensure that Senior Management establish and review environmental objectives and targets for the company activities, products, and services.
- Reduce consumption of non-renewable resources.
- Eliminate, reduce, reuse, recover and recycle waste, compatible with best practices and best available techniques (BAT).
- Eliminate, reduce, and control the effects of the APE's activities on flora and fauna.
- Prevent pollution to air, land, or water whenever practicable.
- Eliminate, reduce, and control the effects of noise, dust, light, and traffic movement on stakeholder groups, the natural environment and local ecosystems so far as is practicable. Ensure that all company employees are made aware of the environmental objectives and targets of this policy and the contribution expected from them towards meeting organizational targets and objectives.
- Provide adequate information, instruction, training, and supervision to individuals to ensure that they have the necessary competence to undertake their activities safely and without risk to the environment.
- Comply with the standards with ISO 45001 and 14001.
- Promote continuous improvement.

The Board of Directors is responsible for the Environmental Policy and the maintenance of associated documentation. The Environmental Policy will be brought to the attention of all employees via the notice board and electronically and will be reviewed annually as minimum to assess its effectiveness, compliance with key legislation, and that it reflects changing needs and circumstances.

Darren Bailey
