

Generators

The Perfect Partnership

Applied Power Engineering.

Working closely with customers on complex and challenging power generation projects. Our dedicated design team offer tailor made, bespoke systems to meet a variety of requirements and specifications.

Working alongside JCB as an approved distributor, we offer the expertise in power generation solutions, combined with the quality and worldwide reputation synonymous with the JCB brand.

APE + JCB

APE + JCB offer a comprehensive range of generators to suit most applications, from the simplest installation to complex projects.

Utilising our combined skills, we provide an efficient service to meet our customers exacting requirements. Over the years, we have worked on critical projects for a range of customers in various market sections, including:

Utilities

Data Centres

Telecoms

Finance

Healthcare

About APE

APE are specialists in control solutions for diesel and gas power generation. By listening to and working closely with our clients, we offer technical solutions using market leading products to ensure our delivery meets the initial brief as a minimum. Our supply includes; controls, power generation, switchgear and Scada packages.

APE are a multi-disciplined company, trained staff operate at all levels of our business to provide a professional experience. We instil best practises & techniques to provide high level control and power solutions.

St Mary Axe

APE services are tailored to meet the expectations of packages, electrical contractors, consultants and the end client. If you require design and manufacture, then APE will be happy to support your needs, if you require the full design and build package, APE have the ability to meet all your project scope.

Working with our partner, JCB, APE are able to offer a comprehensive solution to your generator requirements: from basic standby to continuous rating power plants for temporary, standby, baseload and demand response applications, all using a variety of engine and alternator configurations.

APE are control and power solutions specialists. The vast experience of diesel and gas applications and industry product knowledge make APE designs reliable, flexible and intuitive. APE design solutions function in the real world.

“Resilience,” APE’s open, transparent approach, allows decisions to be made on factual information. The world’s largest IT company used an APE design and build service for their 14 synchronising breaker system - a DUAL redundant control system complimented with redundant diverse communications and furnished with multiple HMI touchscreens.
